

AI for Teams

SERVICE DEEP DIVE

Training + enablement for leaders, managers, and departments.

Help your people move from AI curiosity to practical adoption. eLink trains executives, managers, and teams to use AI responsibly for productivity, communication, decision support, and daily work - then turns the best opportunities into playbooks, guardrails, and an actionable roadmap.

Supported platforms/tools:

ChatGPT

Claude

What AI for Teams includes:

Executive & Manager Enablement

Build shared understanding before pushing AI across the organization.

- Hands-on training for practical personal AI use
- Email, meeting prep, reporting, analysis, and decision support
- Prompting frameworks leaders can use every day

Real-World Use-Case Labs

Apply AI to familiar work so teams see exactly where it fits.

- Live demonstrations using client-specific scenarios
- Customer communication, reputation responses, SOPs, and content examples
- Discovery of repetitive tasks and communication gaps

Playbooks, Guardrails & Roadmap

Create the structure needed for safe, repeatable adoption.

- Safe-use policies, review expectations, and adoption standards
- Role-specific prompt libraries and training materials
- Prioritized opportunity roadmap based on value and ease

Expected outcomes

- Leadership alignment on where AI can create measurable value
- More consistent communication, faster drafting, and better preparation
- A practical adoption plan with safe-use guardrails and success measures
- A prioritized map of high-impact training and implementation opportunities

Example engagement path

- **Discovery** Executive briefing and opportunity mapping
- **Training** One-on-one or small-group manager workshops
- **Enablement** Prompt playbooks, safe-use standards, and team materials
- **Roadmap** Next-phase priorities for workflows, products, or deeper implementation
